

# Medicaid Family Planning Program

If your Medicaid coverage ended with your pregnancy, Medicaid may pay for Family Planning Services.

Medicaid will pay for Family Planning office visits and the following services:

- Annual pelvic exam and Pap test;
- STD testing;
- Family Planning education & counseling;
- Birth Control Methods including Abstinence, Depo Provera, Diaphragm, Foam & Condoms, IUD, the Ring, the Patch, Contraceptive Implants, and Pills;
- Sterilizations for women who have decided not to have more children.

*A two year wait between pregnancies is healthier for mother and child. **Family Planning** will help you plan and space your family.*

You can receive Family Planning Services at your OBGYNs office, Local Health Departments, Community Health Centers, and other local health clinics. Contact your Local Department of Social Services (DSS) to confirm your enrollment.

*A Program of the Commonwealth of Virginia.*
